It has been an honour to meet Ceslovas and an even greater honour to have experienced his creation, Nida.

In my audiophile journey, I have experienced many different speakers, but so far there are none, that in my experience, can be compared with Nidas' musical reproduction. This active speaker system has been and is, a hair raising experience. The details of the clarity of the instruments, and musical reproduction are difficult to surpass.

I cannot find words enough that will do Nidas music reproduction justice. I can only shake this man by the hand and congratulate him.

I am really delighted to have experienced Nida.
